## Office Action Summary

Application No.

10/763,870

Applicant(s)

ROGERS, BRUCE A.

Examiner

Robyn Doan

Art Unit

3732

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on 23 January 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☐ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☐ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 01/23/04.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☒ Other: Attachment A.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-10, 12-14 and 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Takashima (IDS cited reference).

With regard to claims 1, 6, 8-9, Takashima discloses a hair holding device (figs. 14-15) comprising a first body member (40a), a second body member (40b), the first and second body members having gripping portions (see attachment A), a hinge means (916) for pivotally connecting the first and second body members and an elastomeric means comprising at least one continuous elastomeric band (50) contacting the first and second body members in a looped configuration (fig. 15), the elastomeric means in contact with the first and second body members for biasing the first and second body members into a closed position (col. 9, lines 62-65). The device also having means (41, fig. 14) for removably connecting the elastomeric band to the first and second body members. In regard to claims 2-3, -5 and 12, Takashima discloses the elastomeric means having at least one finite length (14) elastomeric strand having a first and second end (fig. 3), means (figs. 12 shows the elastic band with knots) at the first and second

Art Unit: 3732

ends for connecting the at least elastomeric strand to the first and second body and means for removably connecting the at least elastomeric strand to the first and second body (col. 2, lines 44-47, it is also noted that a different embodiment has been shown with regard to claims 2-3, 5 and 12, however, the changes of this particular embodiment are inherently used in all of the embodiments). In regard to claims 13-14, the device further having a torsion spring (25) having a first end contacting the first body member and the second end contacting the second body member (fig. 7). In regard to claims 17-19, the at least one of the first end second body members comprising at least one protrusion (21) being at least one connecting lug (fig. 10a) extending from a hinge axis of the hinge means. In regard to claim 20, the above apparatus is inherently seen to perform the claimed method steps.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takashima in view of Mooneyhan (4554934).

With regard to claims 15-16, Takashima discloses a hair holding device comprising all the claimed limitations in claims 1 and 14 as discussed above except for

Art Unit: 3732

the first and second body members having handle portions. Mooneyhan discloses a hair holding device (fig. 2) comprising a first and second body members (13, 21) which comprise handle portions (41, 47), a torsion spring (37) having a first end being in contact with the handle portion (41) of the first body member and a second end also being in contact with the handle portion (47) of the second member. It would have been obvious to one having an ordinary skill in the art at the time the invention was made to employ the handle portions as taught by Mooneyhan into the hair holding device of Takashima for the purpose of providing handle portions to enhance the movement of the body members in closed or open position.

Claims 4, 7 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takashima.

With regard to claims 4, 7 and 11, Takashima discloses a discloses a hair holding device comprising all the claimed limitations in claim 1 as discussed above except for the elastomeric means being permanently connected to the first and second members and means for permanently connecting the at least one elastomeric band to the first and second body members. It would have been obvious to one having an ordinary skill in the art at the time the invention was made to form the elastomeric means being permanently connected to the first and second members and means for permanently connecting the at least one elastomeric band to the first and second body members, since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Potut and Jones are cited to show the state of the art with respect to a hair holding device.

The drawings filed 01/23/04 have been approved by the Examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robyn Doan whose telephone number is (703) 306-9182. The examiner can normally be reached on Mon-Fri 9:30-7:00; alternate Mondays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on (703) 308-2582. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
